BRIEF SUBJECT INDEX

TO THE
TRANSACTIONS OF THE INSTITUTION OF ENGINEERS
IN SCOTLAND

PROCEEDINGS OF THE SCOTTISH
SHIPBUILDERS' ASSOCIATION

AND

TRANSACTIONS OF THE INSTITUTION OF ENGINEERS
AND SHIPBUILDERS IN SCOTLAND

The Institution of Engineers in Scotland was founded in 1857, and the first annual volume of Transactions was for the year 1857–58. In 1860 the Scottish Shipbuilders' Association was formed, and issued Proceedings from 1860 to 1865. The annual volumes of the Association were separately paged, but not numbered, and the bound volumes were for the years 1860-63 and 1863-65.

In 1865 the two bodies amalgamated under the title of "The Institution of Engineers in Scotland, with which is incorporated the Scottish Shipbuilders' Association," and in 1875 the present title was adopted. The series of volume numbers begun in 1857 has been continued throughout.

In order to give some indication of the date of the various papers, all references to volumes are by session and not by volume number. The Proceedings of the Scottish Shipbuilders' Association are indicated by the letters S.S.A. prefixed to the date. Under each heading the entries are arranged chronologically.
ADDRESSES OF PRESIDENTS

R. Duncan; 1872–73, p. 1; 1873-74, p. 1.
R. Caird; 1899–1900, p. 1; 1900–01, p. 1.
J. Gilchrist; 1905–06, p. 3; 1906–07, p. 1.
C. P. Hogg; 1909–10, p. 1.
A. Barr; 1910–11, p. 1.
Harold E. Yarrow (later Sir); 1921–22, p. 1; 1922–23, p. 1; 1936–37, p. 672.
Sir Andrew McConnal; 1951–52, p. 1.

ADMINISTRATION

See also Efficiency, Management, and Workshops and Works Management.
Engineering Crisis in the Navy, by D. B. Morison; 1900–01, p. 102.

AERONAUTICS AND AIRCRAFT

Problem of Cross-Atlantic Flying, by L. B. Desbordes (Abridged); 1916–17, p. 345.
Aerodynamics of the Rotating Cylinder, by A. Thom; 1924–25, p. 780.
Seadrome or Floating Station, by F. G. Creed; 1938–39, p. 497.

AGRICULTURE

Some Problems in Farm Mechanization, by W. J. West; 1949–50, p. 321.

AIR COMPRESSION AND PUMPING

See also Pneumatic Machinery
Recent Developments in Air Pump Design, by F. Jones; 1916–17, p. 345.
Condensers, Air Pumps and Ejectors, by F. J. Maunder (Abridged); 1927–28, p. 769.

AIR CONDITIONING

ALLOYS

See also Metals

Nickel Steel, by W. Bearde; 1895–96, p. 228.
Manufacture of Brass Condenser Tubes, with Some Notes on an Alternative Alloy, by G. H. Whiteman and A. Spittle; 1924–25, p. 600.
Modern Non-Ferrous Castings and their Engineering Interest, by F. Hudson; 1937–38, p. 216.
Developments in Alloy Sections and Tubes for Marine Engineering, by A. B. Graham; 1938–39, p. 188.
Shipbuilding and Light Alloys, by J. C. Goldsworthy; 1943–44, p. 44.

ALUMINIUM

Shipbuilding and Light Alloys, by E. C. Goldsworthy; 1943–44, p. 44.
Marine Developments in Aluminium, by J. Venus; 1951–52, p. 22.

ARMAMENTS

See also Ships and Shipbuilding (Warships)

ATMOSPHERE

AUTOMATIC CONTROL

Description of a Sediment Collector and a Furnace Grate for Steam Boilers, by J. Braidwood; 1899-90, p. 13.

Incrustation of Boilers using Sea Water, by J. R. Napier; 1869-70, p. 43.

Incrustations of Marine Boilers, by J. R. Napier; 1863-64, p. 103.

Bursting of Steam Boilers by Hydraulic Pressure at Denn Works, Dundee, by F. Carnichael; 1869-70, p. 163; 1878-79, p. 97.

Steam Boiler Inspection, by E. B. Marten; 1869-70, p. 197.

Compound Marine Boilers, by E. Kemp; 1888-89, p. 201.

Return Tubular Marine Boiler for High Pressures, by S. Cooper; 1892-93, p. 107.

Evaporative Tests on Land Boilers, by G. C. Thomson; 1894-95, p. 95.

Water-Tube Boilers, by W. H. Watkinson; 1894-95, p. 133.

Internal Corrosion in Steam Boilers, by S. Cooper; 1896-97, p. 41.

Water-Tube Boilers, by F. J. Rowan; 1897-98, p. 29.

Water-Tube Boilers, by W. H. Watkinson; 1897-98, p. 249.

Causes of Failure in Marine Boiler Furnaces, by W. R. Austin; 1897-98, p. 257.

Transmission of Heat through Plates from Hot Gases to Water, by G. Halliday; 1898-99, p. 44.

Circulation in Shell Boilers, by W. Thomson; 1902-03, p. 131.

Boiler Economics and the Use of High Gas Speeds, by J. T. Nicolson; 1910-11, p. 64.

Wider Adoption and Standardization of Water-Tube Boilers, by E. M. Speckman; 1911-12, p. 291.

Development in Auxiliary Units between Exhaust Pipe and Boiler, by W. Weir; 1912-13, p. 9.

How the Efficiency of the Scottish Boiler can be Improved, by J. Tait; 1914-15, p. 65.

Air Supply to Boiler Rooms, by R. W. Allen; 1918-19, p. 12.

Use, Improvements and Test Results of the Multiple Retort Underfeed Stoker in the United States, by J. G. Worker; 1926-27, p. 669.
Recent Research on Caustic Cracking in Boilers, by C. D. Weir; 1948-49, p. 166.
Selection and Application of Oil Burners, by A. B. S. Laidlaw; 1950-51, p. 308.
High Pressure Boilers, by T. Carillo; 1954-55, p. 150.

BORING

See also Excavating Machinery and Earthwork, and Mines
Machinery for Boring Stratified and Other Rocks, by O. Simpson; 1881-82, p. 154.

BRICK-MAKING

Continuous Regenerative Gas Kiln for Burning Fire-bricks, by J. Mayer; 1884-85, p. 207; 1885-86, p. 197.

BRIDGES

Movable Bridges, by D. McCall; 1861-62, p. 94.
Renewing the Substructures of Railway Bridges and Viaducts without Stopping Traffic, by J. Downie; 1863-64, p. 109.
Presidential Address (Clyde Improvements), by J. M. Gale; 1888-89, p. 1.
Improvements in the Construction and Working of Swing Bridges Spanning Water Spans, Caissons, etc., by D. Cunningham; 1872-73, p. 93.
Design and Construction of Partick Bridge, by C. C. Lindsay; 1877-78, p. 82.
Proposed Bridges for Carrying the N.B. Railway across the Firth of Forth, with Remarks on the Structure and Cause of the Fall of Tay Bridge, by S. J. V. Day; 1879-80, p. 129.
Manipulating the Material, and Building and Drilling the Great Tubes of the Forth Bridge, by A. S. Biggart; 1884-85, p. 21.
Sinking the Cylinders of the Tay Bridge by Pontoons, by A. S. Biggart; 1884-85, p. 263.
Forth Bridge Great Caissons, their Structure, Building and Founding, by A. S. Biggart; 1885–86, p. 19.

Bridge Construction with reference to Cantilever Span for Bridge over the Houghly River, by A. Finlay; 1885–86, p. 169.

Erecting the Superstructure of the Tay Bridge, by A. S. Biggart; 1886–87, p. 57.

Manufacture of Girders used in the Forth Bridge, by A. S. Biggart; 1888–89, p. 37.

Bridges of the Manchester Ship Canal, by E. C. Carey; 1892–93, p. 73.

Bridge-Building, by A. S. Biggart; 1908–09, p. 74.

Two Opening Bridges over River Lee at Cork, by R. L. Biggart; 1910–11, p. 431.

New Type of Low-Level Bridge, by J. Galbraith; 1920–21, p. 455.

Workshop Practice in Bridge Construction, by J. Arrol (Abridged); 1920–21, p. 605.

Modern Methods of Steel Bridge Manufacture, by J. Thomson; 1931–32, p. 270.

BUILDING

New Method of Building under Water, by J. Moffat; 1864–65, p. 36.

Reinforced Concrete as a Structural Material, by O. Faber; 1924–35, p. 337.

Recent Developments in Steel Frame Construction, by C. J. Kavanagh; 1935–36, p. 64.

Waterproof Building, by R. Fitzmaurice; 1940–41, p. 233.

Blast-Furnace Slag as a Building Material, by T. W. Parker; 1950–51, p. 192.

BY-PRODUCTS

See also Fuel

Recovery of Tar and Ammonia from Blast Furnace Gases, by A. Gillespie; 1895–96, p. 187.

CABLES

Chain Cables, by T. S. Glover; 1943–44, p. 11.

CALCULATIONS

GENERAL (see also Measures and Mechanics)

Calculating Machines, by E. M. Horsburgh; 1919–20, p. 117.
Continuous Process for Root Extraction by Calculating Machines, by E. M. Horsburgh; 1922–23, p. 73.
Economy by Efficient Calculation, by W. Heigh; 1948–49, p. 31.

SHIPS

Calculating the Displacement of Ships with Trochoid Water Lines and Certain Forms of Midship Sections, by J. R. Napier; 1865–66, p. 165.

THERMODYNAMICS

CANALS

Navigation of Canals by Screw Steamers, by N. Robson; 1837–58, p. 49.

CAVITATION

CEMENT, CONCRETE, ETC.

Portland Cement Mortar, by C. P. Hogg; 1892–93, p. 19.
Reinforced Concrete and its Practical Application, by M. Kahn; 1907–08, p. 295.
Concrete Pile Foundations, with reference to the "Simplex" Method of Constructing Same, by A. Melville; 1909–10, p. 91.
Concrete Roads, with Special Reference to Crack Control and Shrinkage Forces, by J. H. Walker; 1933–34, p. 227.
Reinforced Concrete as a Structural Material, by O. Faber; 1934–35, p. 287.
Blast-Furnace Slag as a Building Material, by T. W. Parker; 1950–51, p. 192.

CHAIN
Chain Cables, by T. S. Glover; 1943–44, p. 11.
Higher Tensile Short-Link Steel Chain and Chain Slings, by W. Gibson Biggart; 1951–52, p. 149.

CHEMICAL ENGINEERING
Santa Isabel Nitrate Works, Toco, Chile, by G. M. Hunter; 1892–93, p. 57.

CHIMNEYS
See also Combustion
Factory Chimneys, by P. Carmichael; 1864–65, p. 105.

CHRONOMETRY
Rule of a Clock or Chronometer as Influenced by the Mode of Suspension, by Sir Wm. Thomson; 1866–67, p. 130.
Clock and Striking Mechanisms for the Great Bell of the University of Bristol, by D. Robertson; 1926–27, p. 244.

CINEMATOGRAPHY
Cinematograph Apparatus, with Special Reference to Sound Projection, by D. W. Hamilton; 1934–35, p. 84.

CIVIL ENGINEERING
See also Building, Docks and Harbours, Excavating and Earthwork, Foundations, Sewage, Structures, Tunnelling, and Water Supply

COAL
See Combustion, Fuel, and Mines

COKEING
COMBUSTION

See also Chimneys, Fuels, Furnaces, and Heat

Combustion of Coal, with Description of an Improved Method of Conducting such Combustion, by W. German; 1888–89, p. 70.

Comparisons of Systems of Mechanical Draught, by J. Thom; 1895–96, p. 65.

Combustion Chart for Coal and Oil Fuels; and a Check on Flue, Exhaust and Producer Gas Analyses, by J. D. Cormack; 1913–14, p. 333.

Use, Improvements and Test Results of the Multiple Retort Underfeed Stoker in the United States, by J. G. Worker; 1920–27, p. 669.

CONDENSATION AND CONDENSERS

See also Heat

Necessity for Surface Condensation and different methods of effecting the same, by T. Davison; 1860–61, p. 69.

Mechanical and Economical Advantages and Disadvantages of Surface Condensation, by J. F. Spencer; 1861–62, p. 70.

Surface Condensers, by J. Howden; 1867–68, p. 107.

Experiments on Morton’s Ejector-Condenser, by W. J. M. Rankins; 1868–69, p. 73.

Conical Surface Condenser, by J. Henderson; 1870–71, p. 139.

Condenser for Steam Engine, by J. W. McCarter; 1871–72, p. 27.

Utilisation of Water of Condensation from Steam Pipes and Cylinders, by P. Fyfe; 1889–90, p. 75.

Loss by Condensation and Re-evaporation in Marine Engine Cylinders, by E. C. Peck; 1889–90, p. 109.

Initial Condensation in Steam Engine Cylinders, by A. L. Mellanby; 1911–12, p. 51.

Experiments on Condensation of Steam, by G. C. Webster; 1913–14, p. 88.

Recent Developments in Air Pump Design, by E. Jones; 1916–17, p. 245.
CENTENARY SUBJECT INDEX

Heat Transfer in Surface Condensers, by A. W. Porter; 1918–19, p. 108.

Manufacture of Brass Condenser Tubes, with some notes on an Alternative Alloy, by G. H. Whiteman and A. Spittle; 1924–25, p. 660.

Recent Developments in Marine Auxiliaries, by J. R. Lang (Abridged); 1926–27, p. 761.

Condensers, Air Pumps and Ejectors, by F. J. Mamer (Abridged); 1927–28, p. 763.

COPPER

Copper and Copper Castings, by G. C. Thomson; 1887–88, p. 53.

CORROSION

Corrosion of the Exposed Part of a Screw Propeller Shaft, by A. Gilchrist; 1862–63, p. 68.

Protection of Iron Ships from Oxidation and Fouling, by W. J. Hay; S.S.A., 1863–64, p. 70.

Corrosion and Preservation of Iron and Steel, by C. C. Lindsay; 1880–81, p. 77.

Internal Corrosion in Steam Boilers, by S. Cooper; 1896–97, p. 41.

Scrapping of Water Mains, by J. Barr; 1896–97, p. 201.

Serious Deterioration of Steel Vessels from the effects of Corrosion, by G. Johnstone; 1901–02, p. 71.

CRANES

See also Mechanical Handling, and Docks and Harbours

New Type of Shipyard Crane, by W. Hik; 1919–20, p. 266.

Design of a Modern Monotower Crane, by J. Patrick; 1932–33, p. 225.
DESTRUCTORS

DIESEL ENGINES
See Internal-Combustion Engines

DIVING AND UNDER-WATER CONSTRUCTION
See also Docks and Harbours, and Foundations
New Method of Building under Water, by J. Moffat: 1864–65, p. 36.

DOCK MACHINERY
See also Cranes, and Mechanical Handling

DOCKS AND HARBOURS
Patent Slip Docks, by R. B. Bell; 1888–90, p. 36.
Removal of Junction Lock at Grangemouth Harbour, and its replacement by an Enlarged Lock, by J. Milne; 1898, p. 159.
Presidential Address (Clyde Improvements), by J. M. Gale; 1888–89, p. 1.
Harbours, by D. Cunningham; 1874–75, p. 73.
Scientific Form of Harbours, as applied to the Port of Melbourne, by W. G. Jenkins; 1878–79, p. 59.
St. Helier’s Harbour Works, by I. Bell; 1879–80, p. 275.
Sloping Concrete-Block Breakwater at Emu Bay, Tasmania, by W. R. Bell; 1892–93, p. 267.
Old Quay Walls of Glasgow Harbour, by W. M. Alston; 1902–03, p. 305.
Utilisation of Ground Adjoining Harbours and Railway Stations by the Aid of Mechanical Conveyors, by H. Ollendorff; 1913–14, p. 254.
Kingston Dock: Its Improvement and Reconstruction, by P. D. Donald; 1916–17, p. 157.
Assessment of Harbour and other Dues for Merchant Ships, by J. Anderson; 1921–22, p. 98.
Slipways with Side Slipping Arrangements, by A. Henderson; 1931–32, p. 262.
CENTENARY SUBJECT INDEX

Recent Improvements and Reconstruction Works in Glasgow Harbour, by A. C. Gardner; 1931-32, p. 459.
Tides and Tidal Phenomena, by A. C. Gardner; 1933-34, p. 503.
River Work for the Queen Mary, by A. C. Gardner; 1936-37, p. 6.

DRAWING
Drawing Office, by A. Denny; 1894-95, p. 277.

DREDGING
Dredging and Dredge Plant, by A. Brown; 1873-74, p. 77.
Dredging and Dredging Appliances, by A. Brown; 1888-89, p. 257.
River Work for the Queen Mary, by A. C. Gardner; 1936-37, p. 6.

DYNAMOMETERS
Rope Dynamometer with Application to Deep Sea Sounding by Steel Wire, by Sir Wm. Thomson; 1872-73, p. 121.

ECONOMICS
See also Efficiency, Industry, and Workshops and Works Management
Need for Improved Organisation in Industry, by A. W. Kirkcaldy; 1916-17, p. 72.
Economic Recuperation after War, by W. R. Scott; 1916-17, p. 195.
Some Effects of War on Merchant Shipbuilding, by J. Craig; 1917-18, p. 288.
Assessment of Harbour and other Dues for Merchant Ships, by J. Anderson; 1921-22, p. 98.

EDUCATION
Education of the Mining Engineer, by J. Young; 1870-71, p. 151.
Presidential Address, by R. B. Bell; 1876-77, p. 1.
Technical Education of Young Engineers, Shipbuilders and Artizans, by A. Jamieson; 1880-81, p. 149.
Education of Engineers, by H. Dyer; 1886-87, p. 127.
University Faculty of Engineering, by H. Dyer; 1889-90, p. 15.
Place of the Laboratory in the Training of Engineers, by A. I. Mellanby; 1907-08, p. 89.
Apprenticeship Training—Including an Account of a Possible System of Continued Education for Engineering Apprentices, by A. P. M. Fleming; 1917–18, p. 78.

Training and Control of Welders, by W. Heigh and J. Orr; 1936–37, p. 118.

Selection of Apprentices, by J. B. Mavor; 1940–41, p. 278.

Discussion on Technical Training, 1944–45, p. 46.

EFFICIENCY

See also Industry, Management, and Workshop and Works Management

Drawing Office, by A. Denny; 1894–95, p. 277.

Economy by Efficient Calculation, by W. Heigh; 1948–49, p. 31.

ELECTRICAL MACHINES

Electrical Navigation, by A. Clark; 1884–85, p. 201.

Designing of Continuous Current Dynamo Machines, by A. Jamieson; 1888–89, p. 143.

Speed Control of Electric Motors when Driven from Constant-Pressure Mains, by W. H. Sayers; 1902–03, p. 218.

Mechanism of Power Transmission from Electric Motors, by W. L. Spence; 1906–07, p. 197.

Electric Propulsion of Ships, with Note on Screw Propellers, by H. A. Mavor; 1907–08, p. 228.

New Electric Drive for Ship and other Auxiliaries, by G. Austin; 1924–25, p. 103.

Polyphase Commutator Motors, by J. E. Parton; 1931–32, p. 492.
ELECTRICITY

Holmes' Magneto-Electric Light Apparatus, by D. Rowan; 1870-71, p. 237.

Electric Lighting for Ships and Mines, by A. Jamieson; 1881-92, p. 79.

Electric Lighting for Workshops and Large Spaces, by A. Jamieson; 1882-83, p. 101.

Electric Lighting of Public Buildings; with special reference to the Athenaeum Electric Light Installation, by A. Jamieson; 1890-91, p. 245.

Electricity in its Relation to Mining, by E. Scott; 1891-92, pp. 73, 277.

Action of Electric Tramway Currents on Submarine Telegraph Cables and other Electric Circuits, by A. Jamieson; 1889-1900, p. 187.

Hewitt Mercury-Vapour Lamp, by M. MacLean; 1903-04, p. 192.

Tramway and Railway Electric Traction, by G. G. Braid; 1906-07, p. 333.

Electrical Equipment of the Cunard Express Steamer Mauretania, by W. C. Martin; 1907-08, p. 421.

Notes on Electric Driving, by T. Parsons; 1907-08, p. 460.

Self-Propelled Electric Vehicles and their Applications, by L. Brockman; 1916-17, p. 94.

Electric Transmission of Power for Propelling Machinery, by W. J. Belsey; 1922-23, p. 401.

New Electric Drive for Ship and other Auxiliaries, by G. Austin; 1924-25, p. 103.

Development in the Uses of Electricity, by R. P. Sloan; 1928-29, p. 625.

Electrical Propulsion for Small Vessels, by W. H. Woolnough; 1930-31, p. 293.

Hydro-Electric Development in Britain and the Empire, by J. Williamson; 1943-44, p. 78.
Electric Discharge Lamps and their Application to Industry, by M. W. Hine; 1944-45, p. 86.
Diesel-Electric Propulsion of Ships, by E. L. N. Towle; 1949-50, p. 49.

ELECTRO-DEPOSITION

ELECTRONICS
Some Electronic Instruments for Marine Turbine Research, by J. Harc and R. B. Conn; 1933-34, p. 417.

EVAPORATION
Obtaining Fresh Water by Evaporation, by G. Russell; 1842-63, p. 52.
Evaporation, by C. Lang; 1888-89, p. 279.
Loss by Condensation and Re-evaporation in Marine Engine Cylinders, by E. C. Peck; 1889-90, p. 190.

EXCAVATING AND EARTHWORK
See also Boring, and Docks and Harbours
Steam Excavating Machine, by E. L. Dorics; 1870-77, p. 81.
Duty of Railway Companies to Cultivate their Embankment Slopes, by L. Hill; 1882-83, p. 35.

EXPLOSIVES
Sketch of the History of Propellants, by Sir Andrew Noble; 1908-9, p. 261.

FANS
See also Mines and Ventilation

FEED WATER

FILTERS
Feed Water Filters, by A. E. Shute; 1898-99, p. 109.
FIRE EXTINCTION
Pyroletor, or Fire Destroyer, by J. Paton; 1874–75, p. 65.

FLY-WHEELS
Stresses in the Rim and Arms of a Fly-wheel Rotating at Constant Speed, by J. G. Longbottom; 1918–19, p. 149.

FOUNDATIONS
See also Diving, Docks and Harbours, and Pile-Drivers
Properties of Screw Piles for Iron Piers, by W. Murray; 1883–84, p. 169.
Concrete pile Foundations, with reference to the "Simplex" Method of Constructing the Same, by A. Melville; 1909–10, p. 97.

FOUNDRY PRACTICE
See also Iron, and Steel
Steel Castings, by F. W. Dick; 1880–81, p. 132.
copper and Copper Castings, by G. G. Thornton; 1887–88, p. 53.
Production of Sound Castings by Controlled Rate of Heat Transfer, by C. A. Parlanini; 1952–53, p. 246.

FRICTION
See also Lubrication
Frictional Engaging and Disengaging Gear, by D. More; 1858–59, p. 28.

FUEL
See also Combustion
Economic Value of Banker Coal, by O. Kahne; 1925–26, p. 250.
Modern Developments in Pulverised Coal Firing, by R. Jackson; 1926–27, p. 618.
Low Temperature Carbonisation, by W. A. Bristow; 1928–29, p. 258.
Liquid Fuel from Coal for Naval Purposes, by S. H. Dunk; 1933–34, p. 54.

FURNACES

See also Blast Furnaces

Arrangements for applying a Hot-blast to Locomotive Furnaces, by W. Morrison; 1899–00, p. 69.
Improved Smoke-consuming Furnace, by J. Moffat; 1899–00, p. 99.
Heat-Restoring Gas Furnace, including late improvements and adaptations to Puddling and Heating Iron, etc., by W. German; 1879–71, p. 245.
Selection and Application of Oil Burners, by A. B. S. Laidlaw; 1930–31, p. 368.

GAS

Gas Engineering, by D. Laidlaw; 1899–01, p. 80.
Large Gasholder and Tank Recently Erected by the Glasgow City and Suburban Gas Co., by H. Bartholomew; 1860–61, p. 87.
New Gas Producer, by J. A. Parves; 1900–01, p. 15.
Presidential Address (Manufacture, lighting and recovery of by-products), by W. Feule; 1901–02, p. 1.
Suction Gas Engines and Gas Plants, by H. Campbell; 1906–07, p. 82.
Power Gas Producers, Anthracite and Bituminous Types, by A. Hall-Brown; 1911–12, p. 308.
Flame Cutting of Steel for Welded Joints, by E. J. Clarke; 1933–34, p. 13.

Gauges
See also Indicators, Instruments, and Meters
Wollaston’s Pressure Gauge, by J. R. Napier; 1888–89, p. 110.
Construction and Use of Pressure Gauges, by C. R. L. Lemkes; 1894–95, p. 15.

Gearing
Frictional Engaging and Disengaging Gear, by D. More; 1858–59, p. 28.
Design and Progress of the Floating-Frame Reduction Gear, by J. H. Mosealpine; 1917–18, p. 221.
New Form of Gear, by W. R. Darling; 1921–22, p. 250.
Current Practice in Marine Gearcutting, by A. W. Davis; 1944–45, p. 179.

Geology
Carboniferous Formation of Scotland, by J. Geikie; 1870–71, p. 5.

Governors
Speed Governor, by G. H. Smith; 1857–58, p. 36.
Improved Governor for Screw-Propeller Engines, by G. Weir; 1861–62, p. 15.
New Form of Centrifugal Governor, by Sir Wm. Thomson; 1868–69, p. 67.
Boucard and Bariquand’s “Moderateur Parabolique” and Morton’s Governor, by J. R. Napier; 1868–69, p. 105.
CENTENARY SUBJECT INDEX

Governing Compound Marine Engines, by H. R. Robson; 1874–75, p. 103.
Dunlop’s Patent Pneumatic Governor, by D. J. Dunlop; 1875–76, p. 75.
Electrical Governor for Marine Engines, by L. Hill; 1876–77, p. 41.
Safety Governor, by J. W. Macfurlace; 1886–87, p. 3.

GUNS, ETC.

GYROSCOPES
Some Effects likely to be produced by Gyroscopic Action of Steam Turbines on Board Vessels Pitching in a Sea, by J. B. Henderson; 1904–05, p. 265.
Gyrostats and Gyrostatic Action, by A. Gray; 1904–05, p. 270.

HAMMERS
Design, Treatment, and Handling of Snaps, etc., used in Pneumatic Hammers, by G. D. Hollis; 1919–20, p. 163.

HARBOUR ADMINISTRATION
Assessment of Harbour and Other Dues for Merchant Ships, by J. Anderson; 1921–22, p. 98.

HAULAGE IN MINES
See also Mines

HEAT
See also Boilers, Condensers, Internal-Combustion Engines and Steam Engines
Applications of the Theory of Thermodynamics, by R. Mansel; 1891–92, p. 55.
Energy and Entropy and their Applications to the Theories of Air and Steam, by H. Dyer; 1884–85, p. 55.
Heating Installations of Passenger Ships, by A. N. Low; 1910–11, p. 447.
CENTENARY SUBJECT INDEX

Heat Transfer in Surface Condensers, by A. W. Porter; 1918-19, p. 108.
District Heating and its Relation to Housing and Town Planning, by D. V. H. Smith; 1940-41, p. 163.
High Frequency Induction Heating, by E. May; 1948-49, p. 498.

HISTORY OF THE INSTITUTION
Presidential Address by J. Gilchrist; 1905-06, p. 2.
Description and Illustrations of Building (I.E.S.), 1908-09, p. 7.
History; 1933-34, p. 619; 1939-40, p. 25.
Presidential Address, by Sir Harold E. Yarrow; 1956-57, p. 672.

HYDRAULIC MACHINERY AND HYDRAULICS
See also Pumps, and Water Supply
Hydraulic Presses and some Improvements in their Construction, by D. Mere; 1859-60, p. 58.
Description of a Hydraulic Engine for working Organ Bellows; 1862-63, p. 108.
Improvements in Hydraulic Presses, by W. Wams; 1877-78, p. 31.
Reliability of Tests of Turbines, by R. H. Thurston; 1884-85, p. 199.
Hydraulic Plant for Bessemer and Basic Steel Works, by F. Finlayson; 1885-86, p. 155.
Record of Experiments on Flow of Water over Bell-mouthed Pipes, by J. Bell; 1899-1900, p. 59.
Experimental Results of Tests with a Pelton Wheel, by W. C. Houston; 1902-03, p. 275.
Duplication or Looping of Water Mains, by W. Blackadder; 1920–21, p. 328.

Dimensional Analysis of Centrifugal Pump and Blower Performance, by G. G. McDonald; 1940–41, p. 13.

Hydro-Electric Development in Britain and the Empire, by J. Williamson; 1943–44, p. 78.

INDICATORS

See also Gauges, Instruments, and Meters

Improved Steam Engine Indicator, by J. Hannan; 1865–66, p. 76.

Indicator for Ascertaining the Speed of Ships, by J. R. Napier; 1846–47, p. 237.

Indicator as applied to Modern Steam Machinery, by W. C. Wallace; 1887–88, p. 17.

Frahm Speed Indicator, by W. C. Martin; 1905–06, p. 169.

INDUSTRIAL MACHINERY

Notes on Sugar Machinery, by A. B. Dennistoun (Abridged); 1913–14, p. 610.

INDUSTRY

See also Economics, Efficiency, Management, and Workshops and Works Management

Need for Improved Organisation in Industry, by A W. Kirkaldy; 1916–17, p. 72.

The Industrial Engineer, by A. J. T. Taylor; 1937–38, p. 32.

INJECTORS

Exhaust Steam Injector, by L. J. Groves; 1882–83, p. 159.

INSTITUTION OF ENGINEERS AND SHIPBUILDERS IN SCOTLAND

Presidential Address (History), by G. Russell; 1897–98, p. 1.

Presidential Address (History), by J. Gilchrist; 1905–06, p. 3.
CENTENARY SUBJECT INDEX

Description and Illustrations of Building; 1908-09, p. 7.
History; 1930-31, p. 619.
Presidential Address, by Sir Harold E. Yarrow; 1956-57, p. 672.

INSTRUMENTS

See also Electronics, Gauges, Indicators, and Meters
Combined Engine-Counter and Clock, by A. Mitchell; 1858-59, p. 115.
Self-Acting Tide Gauges, by R. Duncan; S.S.A., 1862-63, p. 75.
Compass Adjustment on the Clyde, by Sir Wm. Thomson; 1870-71, p. 143.
Improved Engine Revolution Counter, by M. T. Brown; 1886-87, p. 77.
Prof. Wiborgh’s Air Pyrometers, by J. Crum; 1891-92, p. 123.
Stroboscope in Speed Measurements and other Engineering Tests, by D. Robertson; 1912-13, p. 332.
Stability Chart for the Use of Shipmasters and Officers, by A. M. Robb; 1926-27, p. 89.
Pressure Detector, by N. Young; 1927-28, p. 357.
Ships’ Speed Meters, by H. Hoppe; 1927-38, p. 498.

INSULATION

Theory and Practice of Thermal Insulation, by G. Laing; 1950-51, p. 25.

INTERNAL-COMBUSTION ENGINES

See also Automobile Engineering, Balancing of Engines, Fly-wheels, Gas, Heat, Indicators, Instruments, and Marine Engines
Priestman’s Oil Engine, by M. E. Mountain; 1891-92, p. 251.
Gas and other Internal-Combustion Engines, by D. Clerk; 1901-02, p. 149.
Suction Gas Engines and Gas Plants, by H. Campbell; 1906-07, p. 52.
Presidential Address (Development for ship propulsion), by R. Hall Brown; 1911-12, p. 1.
Charging of Two-Cycle Internal-Combustion Engines, by R. Hopkins; 1913-14, p. 461.

New Type of Internal-Combustion Engine, by H. F. Fullagar; 1913-14, p. 491.

Some Tests on a Diesel Engine, by W. S. Burns; 1913-14, p. 333.

Presidential Address (Development of automobile engines), by T. B. Murray; 1919-20, p. 1.

Present Position of the Marine Diesel Engine, by J. Richardson; 1920-21, p. 15.

Some Factors Limiting the Power of Diesel Engines, by A. D. Bruce; 1921-22, p. 17.

Development of the Sulzer Engine, by L. J. Le Mesurier; 1922-23, p. 151.

Auxiliary Machinery for Diesel-Engined Vessels, by B. Love; 1923-24, p. 121.

Internal-Combustion Locomotives, by J. Dunlop; 1924-25, p. 234.

Latest Type of Burmeister and Wain Marine Diesel Engine, by H. H. Blaauw; 1924-25, p. 452.

Development of the Nobel Engine, by P. H. D. Wilson; 1925-26, p. 566.

Light Internal-Combustion Engines, by W. P. Kirkwood (Abridged); 1925-26, p. 755.

Steam versus Diesel Machinery for Cargo Vessels, by W. G. Cleghorn; 1926-27, p. 56.

Marine Oil Engines, by D. M. Shannon; 1926-27, p. 119.

Prime Movers, by J. Orr (Abridged); 1927-28, p. 776.

Energy Charts for the Calculation of Standard Efficiencies of Internal-Combustion Engines, by W. J. Goudie; 1928-29, p. 446.

Turbo-Compressor as Supercharger, by J. Holmes; 1930–31, p. 124.

Recent Developments in Diesel Engine Construction, by R. Sulzer; 1932–33, p. 161.

Discussion on Diesel Engines; 1932–33, p. 450.

Analysis of the Performances of Some Diesel Propelling Engines, by A. M. Robb; 1936–37, p. 196.

Vibration Problems in the Design of Marine Oil Engines, by E. H. Woodhead; 1944–45, p. 373.

IRON

See also Metals. and Testing and Testing Machines

Comparative Tensile Strength of Wrought-Iron and Steel, by D. Kirkaldy; S.S.A., 1869–60, p. 132 and following p. 158.

Strength and Fracture of Cast Iron, by W. J. Millar; 1875–76, p. 47.

MANUFACTURE OF HIGH QUALITY CAST IRON IN THE ROTARY PULVERISED-FUEL FURNACE, BY P. N. MACNEIR; 1882–33, p. 356.

CAST IRON AND ITS APPLICATIONS IN ENGINEERING, BY A. CAMPION; 1936–37, p. 166.

LAMPS
Improved Roof Lamp for Railway Carriages, by A. ALLAN; 1861–62, p. 34.
New Form of Oil Burning Lamps, by R. LAVENDER; 1875–77, p. 35.

LIFTS

LIGHTHOUSES
Fog Signals as Applied to Lighthouses, by G. H. SLIGHT; 1883–84, p. 177.
Lighthouse Engineering at Home and Abroad, by J. A. PURVES; 1899–1900, p. 19.

LOCOMOTIVES
See also Balancing of Engines, Bearings, Gauges, Indicators, Lubrication
American Locomotive Engines, by W. NEILSON; 1897–98, p. 119.
Coal-Burning Locomotive Engines, by E. STIRLING; 1888–89, p. 65.
Compounding of Locomotive and other Non-Condensing Engines, by E. RAMP; 1873–76, p. 177.
Steam Turbine Locomotive, by J. MACLEOD; 1929–30, p. 49.
Kitson-Still Locomotive, by H. A. D. ACLAND; 1889–90, p. 316.

LUBRICATION
See also Bearings
Lubricating Apparatus for Locomotive and other Steam Engines, by P. STIRLING; 1881–83, p. 166.
Mineral Oil as a Lubricant, by J. J. COLEMAN; 1872–73, p. 37.

MACHINERY

See also Workshops and Wood-Working Machinery

Mining Machinery, by G. Simpson; 1872–73, p. 75.

Hydraulic Machinery for Deep Mining, by J. Moore; 1881–82, p. 177.

Torsional Oscillation Analysis, by A. W. Davis; 1936–37, p. 401.

MANAGEMENT

See also Workshops and Works Management

MARINE ENGINES AND MACHINERY

See also Internal-Combustion Engines, Ships and Shipbuilding (Propulsion), Steam and Steam Engines, and Steam Turbines

Compound Marine Engines with Three Cylinders Working on to Two Cranks, by R. Douglas; 1881–82, p. 165.

Loss by Condensation and Re-evaporation in Marine Engine Cylinders, by E. C. Peck; 1889–90, p. 159.

Presidential Address (Historical and descriptive), by E. Kemp; 1890–91, p. 1.

Considerations Affecting the Economy of Marine Screw Engines, by E. Hall-Brown; 1901–02, p. 273.

Presidential Address (Development, with chronological table), by J. Ward; 1907–08, p. 1.

Presidential Address (Improvements), by E. Hall-Brown; 1911–12, p. 1.

Presidential Address (Improvements), by A. Clegorn; 1917–18, p. 1.

Presidential Address (Heat losses), by A. Gilchrist; 1921–22, p. 1.

Discussion on Propelling Machinery for Cargo Vessels; 1931–32, p. 496.

Vibrations in Marine Engineering, by A. E. Fothergill; 1951–52, p. 246.
Research in Marine Auxiliary Machinery, by S. Weinberg; 1953–54, p. 357.

MATERIALS

See also Alloys, Aluminium, Cements and Concrete, Copper, Iron, Metals, Plastics, Powder Metallurgy, Steel, Strength of Materials, and Timber

MEASURES

See also Calculations

System of Decimal Measures having the sixteenth-of-an-inch as its Unit, by J. S. Holland; 1857–58, p. 36.
Decimal Measures, by W. Neilson; 1857–58, p. 41.
Distance Measuring in Russia, by C. P. Smyth; 1859–60, p. 96.
Measurement of Registration Tonnage of Ships as regards Crew Space and Spar Decks; 1865–66, p. 124.
Calculating the Displacement of Ships with Trochoid Water Lines and Certain Forms of Midship Sections, by J. R. Napier; 1865–66, p. 165.
Rule of a Clock or Chronometer as influenced by the mode of Suspension, by Sir Wm. Thomson; 1866–67, p. 139.
Difficulties of Speed Calculation, by W. Denny; 1874–75, p. 193.
Importance of Imperial Standards of Length for Free Public Use, by A. B. Allan; 1878–79, p. 117.

MECHANICAL ENGINEERING

MECHANICAL HANDLING

See also Cranes, and Docks and Harbours

Utilisation of Ground Adjoining Harbours and Railway Stations by the Aid of Mechanical Conveyors, by H. Olendorff; 1913–14, p. 254.
Chain Belt Conveyors, by W. H. Atherton; 1918–17, p. 7.
Modern Appliances for the Handling of Coal in the Harbour of Rotterdam, by F. Westendorp; 1923–24, p. 711.

MECHANICS

See also Testing and Testing Machines

Presidential Address (Nomenclature and principles of dynamics), by R. Mansel; 1875–79, p. 1; 1879–80, p. 1.
Presidential Address (Dynamics), by J. Thomson; 1884–85, p. 1.
Comparison of Similar Machines and Structures, by A. Barr; 1898–99, p. 322.
Aerodynamics of the Rotating Cylinder, by A. Thom; 1924–25, p. 730.
Distortion of a Curved Member by Forces Applied to its Ends, by W. H. Riddlesworth; 1928–29, p. 190.
Mechanical Methods of Solution of Stresses in Frames, by C. H. Lobban; 1933–34, p. 169.

METAL SPRAYING

METALS

See also Alloys, Aluminium, Copper, Iron, Steel, and Testing and Testing Machines

Development of Metal Construction in Aircraft, by J. S. Nicholson; 1919–26, p. 185.
Failure of Metals by Creep, by W. Kerr; 1925–26, p. 319.
Deformation of Metals, with Special Reference to the Tensile Test, by C. H. Desch; 1928–29, p. 348.

Note on the Theory of Internal Friction in Metals, by E. M. Horsburgh; 1928–31, p. 496.

Modern Non-Ferrous Castings and their Engineering Interest, by F. Hudson; 1937–38, p. 216.

Developments in Alloy Sections and Tubes for Marine Engineering, by A. B. Graham; 1938–39, p. 188.

Recent Research on Caustic Cracking in Boilers, by C. D. Weir; 1948–49, p. 165.

METERS

Pumping Engine Valve, by W. Neilson; 1837–38, p. 33.
Pumps, by G. Simpson; 1860–61, p. 61.
Addition to Steamer’s Bilge Pumps, by J. R. Napier; 1862–63, p. 66.
Pumping Engines, by A. Barclay; 1870–71, p. 89.
Recent Developments in Air-Pump Design, by E. Jones; 1916–17, p. 245.
CENTENARY SUBJECT INDEX

Loosen in Component Parts of a Three-Stage Turbine Pump, by W. Blackadder; 1923-24, p. 28.
Modern Pumping Engines in Holland, by J. C. Dijzhoorn; 1923-24, p. 624.
Notes on Pumping, by J. A. McCash (Abridged); 1925-26, p. 750.
Condensors, Air Pumps and Ejectors, by F. J. Maunder (Abridged); 1927-28, p. 769.
Oil Pumping System of Two Modern Oil Tank Vessels, by A. D. R. Kelly; 1930-31, p. 288.
Modern Marine Auxiliary Plant, by H. Hillier; 1933-36, p. 256.
Dimensional Analysis of Centrifugal Pump and Blower Performance, by G. G. McDonald; 1940-41, p. 13.
Hydraulic Efficiency of Rotodynamic Pumps, by G. G. McDonald; 1950-51, p. 77.
Techniques for Hydraulic Machinery Research, by S. P. Hutton; 1956-57, p. 331.

RADIO TELEGRAPHY AND TELEPHONY

See also Navigation

Television, by J. L. Baird; 1927-28, p. 608.
Radio in Relation to Shipping, by A. J. Gill; 1935-36, p. 11.
Television, by G. W. O. Howe; 1936-37, p. 111.

RADIOGRAPHY

Gamma-Ray Examination of Materials, by C. Croxson; 1942-43, p. 166.
Radiography in a Clyde Shipyard, by E. J. Duffy; 1952-53, p. 34.

RADIN

Radium and its Properties, by J. Macintyre; 1903-04, p. 163.

RAILWAYS AND ROLLING STOCK

See also Permanent Way, and Tunnelling

Improved Duplex Spring Buffers and Draw Springs for Railway Plant, by A. Allan; 1861-62, p. 27.
St. Enoch Railway Station, by C. P. Hogg; 1881-82, p. 193; 1882-83, p. 33.
Presidential Address, by J. Reid; 1882-83, p. 1.
Tyers' Train Describer, by J. Reid; 1882–83, p. 41.
American Railway Freight Cars, by A. Findlay; 1884–85, p. 253; 1885–86, p. 119.
Construction of Glasgow City and District Railway, by R. Simpson; 1887–88, p. 97.
Railway Construction in the West Indies, by R. Simpson; 1889–90, p. 117.
Renewal of Railway Viaducts and Bridges on the N.D. of the Caledonian Railway, 1889–88, by T. M. Barr; 1890–91, p. 83.
City Union Railway Widening and Extension of St. Enoch Station, by W. Melville; 1900–01, p. 222.
Railways and the Quest for Speed, by A. H. McMurdo; 1938–39, p. 375.

REFINERIES

See Oil

REFRIGERATION

Mechanical Refrigeration, by J. J. Coleman; 1878–79, p. 103.
Use of Nomographs in Determination of Thermal Efficiencies of Internal-Combustion Engines, and Coefficients of Performance of Vapour-Compression Refrigerators, by W. J. Goudie; 1916–17, p. 388.
Application of Precooling by Primary Evaporation and Multiple Effect Compression to CO₂ Refrigerating Machines, by H. Brier; 1925–27, p. 591.
RESEARCH

Some Aspects of Research on Friction and Wear, by F. T. Barwell; 1951-52, p. 64.

Research in Marine Auxiliary Machinery, by S. Weinberg; 1953-54, p. 357.

Some Electronic Instruments for Marine Turbine Research, by J. Hare and R. B. Conn; 1953-54, p. 417.

Investigations on Surface Finish of Steel Shafts, by A. S. T. Thomson, A. W. Scott, W. Ferguson and G. V. Stabler; 1953-54, p. 549.

Recent Work in the Lithgow Water Tunnel at N.P.L., by A. Silverleaf and L. W. Berry; 1956-57, p. 211.

RIVERS

See also Sewage

Purification and Improvement of the River Clyde, by J. Struthers; 1890-91, p. 197.

Glasgow Main Drainage, by A. B. McDonald; 1899-1900, p. 287.

River Work for the Queen Mary, by A. C. Gardner; 1936-37, p. 6.

RIVETING AND JOINTING

See also Welding

Improved Riveting Machine, by H. Smith; 1887-88, p. 37.
Some Points in Connection with the Riveted Attachments in Ships, by J. Brunn; 1902–05, p. 58.

ROADS AND ROAD CONSTRUCTION

Concrete Roads, with Special Reference to Crack Control and Shrinkage Forces, by J. H. Walker; 1933–34, p. 227.

Road Planning, with Special Reference to Safety, by W. H. Budgett; 1936–37, p. 238.

Basic Curve Methods in Road-Curve Design, by W. MacGregor; 1941–42, p. 392.

Skidding and the Slippery Road, by C. G. Giles; 1951–52, p. 195.

ROLLING MILLS

Electrically-Driven Reversing Rolling Mills, by C. A. Ablett; 1909–19, p. 17.

ROPES

Transmission of Power by Ropes, by E. Kenyon; 1904–05, p. 90.

Large-Grained Steel Wire and a Comparison with Rope Wire, by E. M. Horsburgh; 1926–27, p. 6.

Steel Wire Ropes—Their Construction and Application, by F. J. Hewitt; 1933–54, p. 471.

RUBBER

Mechanical Applications of Vulcanised India Rubber, by J. Symes; 1876–71, p. 213.

Problems Relating to the Manufacture and Use of Rubber Tyres, by A. Healey; 1925–26, p. 684.

SAFETY

Higher Tensile Short-Link Steel Chain and Chain Slings, by W. Gibson Biggart; 1951–52, p. 149.

Skidding and the Slippery Road, by C. G. Giles; 1951–52, p. 195.

SALVAGE

CENTENARY SUBJECT INDEX

SCREW THREADS
Screw Nuts with Differential Threads, by J. Hastie; 1889–91, p. 43.

SCREWING MACHINES

SEWAGE
See also Rivers
Method of Utilizing Sewage, by D. A. Graham; 1866–67, p. 223.
Collecting and Disposing of Water-Closet Discharges, by P. T. Harris; 1874–75, p. 231.
Glasgow Main Drainage, by A. B. McDonald; 1889–1900, p. 237.

SHAFTS AND SHAFTING

SHIPS AND SHIPBUILDING
See also Calculations, Gearing, Indicators, Marine Engines, Measures, Naval Architecture, Propellers and Shafting, Welding, and Yachts

GENERAL
Improvements Requisite in Iron Shipbuilding, by W. Simons; 1839–60, pp. 36, 55.
Composite Ships, by J. Jordan; S.S.A., 1863–64, p. 25.
Improvements in the Scutlings of Iron Steam Vessels, by J. Price; 1869–70, p. 33.
New Mode of Constructing Iron and Composite Ships, by J. E. Scott; 1871–72, p. 75.
Early Clyde-built Steamers, by W. J. Millar; 1880–81, p. 49.
Interrelation of Theory and Practice of Shipbuilding, by J. J. O'Neill; 1907–08, p. 236.
Improvements in the Construction of Ships, by E. F. Spanner; 1918–19, p. 64.
Presidential Address (Development of High-Speed Craft), by H. E. Yarrow; 1921–22, p. 1.
Efficiency in Ship Construction from the Strength Point of View, by J. Bruhn; 1923–24, p. 560.
Proposed Form of Bow Construction, by E. F. Spanner; 1924–25, p. 73.
Straight-Frame Ships, by A. M. Robb; 1924–25, p. 313.
Natural Periods of Vibration of Ships, by A. P. Cole; 1928–29, p. 43.
Notes on Damage to Ships, by J. L. Adam; 1928–29, p. 666.
Shipyard Methods and Layout, by G. Barrie; 1933–34, p. 129.
Electrically Welded Ships Bruce Hudson and Transister, by E. R. Macmillan; 1936–37, p. 81.
Ship of the Future, by A. C. Hardy; 1940–41, p. 119.
Shipbuilding and Light Alloys, by E. C. Goldsworth; 1943–44, p. 44.
Presidential Address (Full Employment in British Shipyards), by A. M. Stephen; 1944–45, p. 1.
Timber in Shipbuilding, by E. H. D. Doulton; 1944–45, p. 16.
Modernization on the Reconversion of Engineering and Shipbuilding Workshops, by H. Orenstein; 1945–46, p. 381.
Note on the Block Coefficient of a Ship, by S. B. Rakson; 1947–48, p. 68.
Marine Developments in Aluminium, by J. Venos; 1951–52, p. 22.
Radiography in a Clyde Shipyard, by E. J. Duffy; 1952–53, p. 34.
Position of Longitudinal Centre of Buoyancy for Minimum Resistance, by H. Becker; 1952–54, p. 11.
Hull Structures, by J. Turnbull; 1936–37, p. 301.

ANCHORS
Improved Canting-Crowned Anchors, by Capt. Thomson; 1872–73, p. 20.

BOARD OF TRADE
Late Action of Board of Trade with regard to Storm Valves, by W. Denny; 1877–78, p. 63.

DECORATION
Decoration of Passenger Vessels, by A. Tabb; 1933–34, p. 269.

FERRY BOATS
Proposed Channel Ferry Steamer, by W. M. Neilson; 1869–70, p. 73.

FOULING
Apparatus for Preventing the Fouling of Vessels, by J. Gray; S.S.A., 1863–63, p. 83.
Protection of Iron Ships from Oxidation and Fouling, by W. J. Hay; S.S.A., 1863–64, p. 70.

FREEBOARD AND LOAD LINE
Annual Load Line Surveys, by J. Foster King; 1937–38, p. 422.
Launching
Stability of Ships at Launching, by J. H. Biles; 1883–84, p. 31.
Launch Velocities and Drags, by P. A. Hillhouse; 1922–23, p. 52.
Stresses and Deflections of Two Cargo Liners during Launching, by

Lloyd’s Register
Lloyd’s Rules for Iron Ships and their Improvement, by J. G. Lawrie;
Difference between Lloyd’s and Liverpool Underwriters’ Rules for Iron
Ships, by J. Ferguson; S.S.A., 1884–85, pp. 83, 89.
Proposed Rules for the Construction and Classification of Composite
Ships; 1865–66, p. 170.
Comparative Merits of the Rules of Lloyd’s and Liverpool Underwriters
Ancient History of Ship Regulations, by Sir Wecott S. Abell; 1929–21,
p. 372.

Loading and Discharging Appliances
Oil Pumping System of Two Modern Oil Tank Vessels, by A. D. K.

Mercantile Steamers
Great West of Scotland Fishery Company’s Steamer Idlessman, by J. R.
Napier; 1857–58, p. 90.
Proposed Steamer for Channel Service, by J. Lyall; 1872–73, p. 137;
1873–74, p. 27.
Comparative Commercial Efficiency of some Steamships, by J.
Hamilton; 1881–82, p. 133.
Presidential Address (Table of Dimensions of Notable Atlantic Ships),
by J. Ward; 1907–09, p. 46.
Sixty Years of Lightship Rebuilding on the North-East Coast, by
G. B. Hunter and E. W. de Rosset; 1908–09, p. 322.
Design and Construction of Oil Steamers, by J. Montgomery; 1912–13,
p. 241.
Some Effects of War on Merchant Shipbuilding, by J. Craig; 1917–18,
p. 268.
Speed, Dimensions and Form of Cargo Vessels, by G. S. Baker and
J. L. Kirt; 1918–19, p. 216.
Economic Proportions of Cargo Ships, by W. G. Cleghorn; 1921–22,
p. 276.
Canadian Bulk Cargo Vessels on the Great Lakes, by W. I. Hay and
Possible Future Developments in Atlantic Express Passenger Services,
by J. Anderson; 1925-26, p. 169.
Stream versus Diesel Machinery for Cargo Vessels, by W. G. Cleghorn; 1926–27, p. 60.

Coasters and Small Craft in the Wartime Merchant Shipbuilding Programme, by J. Lenaghan and T. W. Davis; 1946–47, p. 583.

MINISTRY OF TRANSPORT

MOTOR BOATS (see also Yachts)

PERFORMANCE OF SHIPS

Notes on the Trials and Performances of the S.S. Otaki, fitted with a Combination of Reciprocating and Turbine Machinery, by W. M. Wisnom; 1908–09, p. 279.

Parallel Performances of Sister Ships, by F. G. Browne; 1931–32, p. 21.

Propulsive Efficiency of Cargo Ships, by W. Ayre; 1931–32, p. 179.

CENTENARY SUBJECT INDEX

Presentation of Ship Performance Data, with Special Reference to Service Log Abstracts, by W. Ayre; 1934–35, p. 245.

PROPULSION

Effect of a Third Cylinder in the “Clyde” Screw Engine, by J. G. Laurie; 1886–90, p. 110.

Method of Propelling Ships in a Calm by the Action of the Swell or Waves, by G. W. Smith; 1865–66, p. 65.

Propositions on the Motion of Steam Vessels, by R. Mansel; 1875–76, p. 141.

Electrical Navigation, by A. Clark; 1884–85, p. 201.

Effect of Reversing the Screw Propeller of a Steamship upon the Steering, by J. Bain; 1863–94, p. 75.

Electric Propulsion of Ships, with Note on Screw Propellers, by H. A. Mavor; 1907–08, p. 328.

Alternative Types of Propelling Machinery for a 19½-knot Steamer, by J. Dornan; 1915–16, p. 33.

Coal, Oil or Wind? by C. O. Lillegren; 1920–21, p. 242.

Vane-Wheel Propulsion, by M. E. Donny; 1922–23, p. 201.

Steam versus Diesel Machinery for Cargo Vessels, by W. G. Coghorn; 1926–27, p. 50.

Discussion on Propelling Machinery for Cargo Vessels; 1931–32, p. 496.

Back of Propellers, by J. F. C. Conn; 1934–35, p. 27.

Propulsion of Single-Screw Vessels: the Effect of Varying the Speed and Diameter of the Propeller, by G. S. Baker; 1936–37, p. 49.

Humps and Hollows in Curves of Resistance, by A. M. Robb; 1939–40, p. 103.

Diesel-Electric Propulsion of Ships, by E. L. N. Towe; 1949–50, p. 49.

Rolling and Pitching

Period of Rolling of Vessels as an Index of Stability, by F. P. Purvis; 1895–96, p. 47.

Rolling of Ships and the effect of Water-Ballast, by B. C. Laws; 1900–01, p. 74.

Apparatus for Extinguishing the Rolling of Ships, by V. Cremieu; 1907–08, p. 52.

Rudders and Steering

Self-Acting Apparatus for Steering Ships, by J. P. Joule; 1864–65, p. 56.

Improved Screw Steering Apparatus for Ships, by J. Skinner; 1866–67, p. 133.

Automatic Steering Apparatus, by M. A. Stellano; 1872–73, p. 115.

Sadler's Double Rudder and Moveable Propeller Steamship, by Capt. Sadler; 1877–78, p. 55.

Effect of Reversing the Screw Propeller of a Steamship upon the Steering, by J. Bain; 1893–94, p. 75.

Rudders, by J. F. King; 1901–02, p. 196.

Notes on Windlass and Steering-Gear Engines, by F. P. Purvis; 1911–12, p. 90.

Manoeuvring of Ships, Part II—Unbalanced Rudders of Twin-Screw Ships, by G. H. Bottomley; 1923–24, p. 569.

Some Notes on Rudders and the Steering of Ships, by T. B. Abell; 1933–34, p. 465.
SAFETY OF LIFE AT SEA
Safety and Seaworthiness of Vessels, by J. Ferguson; 1865–66, p. 111.
Remarks on 3rd, 13th and 14th Articles of Admiralty Regulations for Preventing Collisions at Sea, by J. R. Naper; 1867–68, p. 33.
Presidential Address, by R. Duncan; 1873–74, p. 1.
Collision Pads for the Prevention of Loss at Sea, by Mr. Richardson; 1886–87, p. 125.
Collisions at Sea, by L. Hill; 1887–88, p. 195.
Ships' Lifeboats, their Stowage and Manipulation, by A. Welin; 1912–13, p. 204.
Comparative Safety of Passenger Vessels of Varying Size, by G. Webster; 1920–21, p. 181.
Annual Lead Line Surveys, by J. F. King; 1937–38, p. 432.
Presidential Address (Survival at Sea), by Sir William Wallace; 1933–34, p. 1.

SAILS
Canvas for Sails of Ships, by P. Carmichael; 1865–66, p. 18.

SHALLOW-DRAUGHT VESSELS
American River Steamers, by W. Neilson; 1858–59, p. 117.
River Steamers, by J. Ferguson; S.S.A., 1880–81, p. 55.

SPEED
Trials of Speed of Steam Vessels in a Tideway, by W. J. M. Rankins; 1863–64, p. 73.
Methods of Analysing the Results of Progressive Speed Trials, by W. Denny; 1884–85, p. 65.
Speed Constants of Ships, by F. Elgar; 1892–93, p. 239.
Rates of Speed and Rates of Freight, by J. Inglis; 1895–96, p. 167.
Effect of Bossing upon Resistance, by H. C. Sadler; 1908–09, p. 147.

Speed, Dimensions and Form of Cargo Vessels, by G. S. Baker and J. L. Kent; 1918–19, p. 216.

**Stability**

Stability of Ships at Launching, by J. H. Biles; 1883–84, p. 31.

Stability, etc., of Oil-carrying Steamers, by P. Jenkins; 1888–89, p. 225.

Period of Rolling of Vessels as an Index of Stability, by F. P. Purvis; 1885–96, p. 47.

Stability of Ships, by G. Nicol; 1918–19, p. 183.

Effect of Waves on Transverse Stability, by G. R. Edgar; 1920–21, p. 149.

Stability Chart for the Use of Shipmasters and Officers, by A. M. Robb; 1926–27, p. 89.

**Strength**

Longitudinal Sea Strains in Vessels, by R. Mansel; 1877–78, p. 105.

Strength of Ships' Beams, by W. D. Archer; 1894–95, p. 213.

Efficiency in Ship Construction from the Strength point of View, by J. Bruhn; 1923–24, p. 560.

Simplified Calculation of Longitudinal Bending Moments, by A. Mandelli; 1955-56, p. 265.

SUBDIVISION

Water-tight Subdivision of Ships, by J. Bruhn; 1912-13, p. 119.

Subdivision of Passenger Ships, by J. F. King; 1923-24, p. 359.

SUBMARINES

WARSHIPS (see also Armaments)

Construction of Battleships, by W. Simons; 1839-60, p. 71.

Fifty Years of Warship Building on the Clyde, by J. H. Biles; 1908-09, p. 347.

High-Speed Craft during the War, by W. W. Marriner; 1919-20, p. 313.

Presidential Address (Tank Experiments for Torpedo Boats), by H. E. Yarrow; 1921-22, p. 1.

Damage to H.M.S. Hunter, by H. Stanley; 1937-38, p. 55.

SHIPS’ FITTINGS AND AUXILIARIES

See also Indicators, Instruments, and Ships and Shipbuilding

Iron and Steel Spars, by J. G. Lawrie; S.S.A., 1863-64, p. 55.

Tripod Masts, by C. Colen; S.S.A., 1863-64, p. 80.

Improved Casting-Crowned Anchors, by Capt. Thomson; 1872-73, p. 19.

Rope Dynamometers with Application to Deep-Sea Sounding by Steel Wire, by Sir Wm. Thomson; 1872-73, p. 121.
CENTENARY SUBJECT INDEX

Electrical Equipment of the Cunard Express Steamer Mauretania, by W. C. Martin; 1907-08, p. 421.

Heating Installations of Passenger Ships, by A. N. Low (Abridged); 1910-11, p. 447.

Notes on Windlass and Steering Gear Engines, by F. P. Parvis; 1911-12, p. 99.

Auxiliary Machinery for Diesel-Engined Vessels, by R. Love; 1923-24, p. 121.

Machinery Installation of the ex-German Battleship Grosser Kurfürst, by J. S. Brown; 1926-27, p. 537.

Recent Developments in Marine Auxiliaries, by J. R. Lang (Abridged); 1926-27, p. 761.

Note on the Development and Operating Results of Bauer-Wach Installations, by R. J. Butler; 1932-33, p. 66.

Refrigerated Holds and the Carriage of Foodstuffs, by A. J. M. Smith; 1932-33, p. 531.

Some Notes on Rudders and the Steering of Ships, by T. B. Abell; 1933-34, p. 405.

Ships’ Speed Meters, by H. Hoppe; 1937-38, p. 498.

Presidential Address (Compass and other Aids to Navigation), by F. C. Stewart; 1941-42, p. 1.

Hydraulic Automotive Apparatus for Ships, by E. B. Ball; 1941-42, p. 169.

Chain Cables, by T. S. Glover; 1943-44, p. 11.

Alternating Current Supplies for Auxiliary Plant on Board Ship, by N. V. Pesteroff; 1950-51, p. 413.

Research in Marine Auxiliary Machinery, by S. Weinberg; 1953-54, p. 357.

SIMILARITY
Comparisons of Similar Structures and Machines, by A. Barr; 1898–99, p. 322.

SLIPWAYS

SMOKE PREVENTION
See also Fuel
Smoke Problem, by F. J. Rowan; 1904–05, p. 7.

SOIL MECHANICS

SOUND
Controlled Acoustics in Meeting Rooms, by E. A. Harroway; 1934–35, p. 10.

STABILITY

STANDARDIZATION
Trade Value of Simplification and Standardization in details of Ships and their Machinery, by C. Le Maître; 1926–27, p. 804.

STEAM AND STEAM ENGINES
See also Balancing of Engines, Bearings, Fly-wheels, Gauges,Governors, Indicators, Instruments, Locomotives, Marine Engines, Packing, Pistons, Steam Turbines, Valves and Valve Gear, and Winding Engines

Employing Steam Expansively, by A. Morton; 1857–58, p. 68.
Economic Use of Steam in Steam Engines, by F. Carmichael; 1858–59, p. 47.
Working of Steam Engine and Boiler at Scotland Street Iron Works, by W. Tait; 1859–60, p. 47.

Conditions Affecting Steamship Economy, by O. Hammerten; S.S.A., 1861–92, p. 73.

Effects of Superheated Steam and Oscillating Paddles on the Speed and Economy of Steamers, by J. R. Napier; 1863–64, p. 86.

Temperature and Elasticity of Steam, by A. Morton; 1870–71, p. 203.

Application of Steel Liners to the High Pressure Cylinders of Compound Marine Engines, by W. Allan; 1873–74, p. 39.

Compound Engines, by M. Prior; 1876–77, p. 57.

Theory of the Steam Engine and some of its Bearings on Current Marine Engineering Practice, by H. Dyer; 1885–86, p. 47.

Recent Steam Engine Trials, by H. Dyer; 1888–89, p. 177.

" Rota " Engine, by J. M. Ross; 1889–90, p. 171.

Rotary and Reaction Engines, by A. Morton; 1893–94, p. 91.

New Departure in Steam Engine Economy, with a Description and Tests of Field's Combined Steam and Hot Air Engine, by A. Jamieson; 1894–95, p. 291; (Discussion) 1895–96, p. 15.

Maximum Elasticity and Density of Steam, by A. Morton; 1896–97, p. 11.

Examples of Four-Crank Engines and their Auxiliaries, by J. Thom; 1898–99, p. 213.

Notes Relating to the de Laval Steam Turbine, the Wiredrawing Calorimeter, and the Superheating of Steam by Wiredrawing, by W. H. Watkinson; 1902–33, p. 184.

Superheated Steam, by F. J. Rowan; 1903–04, p. 4.

Breakage and Renewal of a Large Cylinder, by H. MacColl; 1904–05, p. 78.

Most Economical Mean Effective Pressure for Steam Engines, by R. Royds; 1905–07, p. 278.

Influence of Steam Pressure, Speed of Rotation, and Number of Expansions upon the Mean Effective Pressure, and Steam Consumption of Steam Engines, by R. Royds; 1908–09, p. 194.

New Experimental Steam Engine at Glasgow and West of Scotland Technical College, by A. L. Mellenby; 1909–10, p. 315.

Initial Condensation in Steam Engine Cylinders, by A. L. Melanby; 1911-12, p. 31.

Steam Regenerative Accumulators, by D. B. Morison; 1911-12, p. 268.
Experiments on Condensation of Steam, by C. C. Webster; 1913-14, p. 88.

Review of Progress in the Marine Steam Engine on the N.E. Coast during the Last Fifteen Years, by A. C. Ross; 1918-19, p. 440.

Ruth's Steam Accumulator, by A. J. T. Taylor; 1925-26, p. 11.
Development of Increased Efficiency in Steam Application for Marine Purposes, by Sir James Kemnal; 1925-26, p. 495.

Steam versus Diesel Machinery for Cargo Vessels, by W. G. Cleghorn; 1926-27, p. 59.

Recent Developments in Marine Auxiliaries, by J. R. Lang (Abridged); 1928-29, p. 761.

Historical References to the Progress in the Use of High-Pressure Steam, by J. Molison; 1926-27, p. 783.

Industrial Engines, by A. J. T. Taylor; 1927-28, p. 32.

Prime Movers, by J. Orr (Abridged); 1927-28, p. 776.

Presidential Address (Heat Losses in Marine Engines), by A. Gilchrist; 1931-32, p. 1.

Steam for Power and Process Work, by H. E. Partridge; 1943-44, p. 183.

STEAM TURBINES
See also Nozzles, and Steam and Steam Engines

Marine Steam Turbine and its Application to Fast Vessels, by C. A. Parsons; 1909-11, p. 175.

Steam Turbines: with Special Reference to the de Laval Type of Turbine, by K. Anderson; 1902-03, p. 8.

Notes Relating to de Laval Steam Turbine, etc., by W. H. Watkinson; 1902-03, p. 194.
CENTENARY SUBJECT INDEX

Multiple Steam Turbines, by A. Melencovich; 1904-05, p. 150.
Effects likely to be produced by the Gyroscopic Action of Steam Turbines on board Vessels Pitching in a Sea, by J. R. Henderson; 1904-05, p. 265.
Determination of the Principal Dimensions of the Steam Turbine, with Special Reference to Marine Work; by E. M. Speakman; 1905-06, p. 17.
Steam Regenerative Accumulators, by D. B. Morison; 1911-12, p. 288.
Recent Developments of the Exhaust-Steam Turbine, by G. Bauer; 1927-28, p. 255.
Steam Turbine Locomotive, by J. MacLeod; 1929-30, p. 49.
Note on the Development and Operating Results of Bauer-Wach Installations, by R. J. Butter; 1932-33, p. 66.
Turbocompressors for High Pressures, by W. J. Kearton; 1937-38, p. 301.

STEEL
See also Alloys, Metals, and Testing and Testing Machines
Comparative Tensile Strength of Wrought Iron and Steel, by D. Kirkaldy; S.S.A., 1860-61, p. 133 and following p. 158.
Employment of Steel in Shipbuilding and Marine Engineering, by G. Barber; 1896-97, p. 96.
Manufacture of Cast Steel, by B. D. Healey; 1871-72, p. 121; 1872-73, p. 155.
Mild Steel or Ingot Metal, by P. F. MacCallum; 1881-82, p. 31.
Crystalline Structure of Steel, by G. S. Racker; 1881-82, p. 147.
Hydraulic Plant for Bessemer and Basic Steel Works, by F. Finlayson; 1885-86, p. 155.
Recent Examples of Steel Structural Work, by A. S. Beggart; 1896-97, p. 143.
Basic Refined Steel on the Continent, by C. E. Stromeyer; 1897-98, p. 227.
Some Causes of Injury to Steel after Manufacture, by C. H. Desch; 1913-14, p. 25.
Stress Lines in Steel after Permanent Deformation, by A. McCance; 1918-19, p. 252.

Large-Grained Steel Wire and a Comparison with Rope Wire, by E. M. Horsburgh; 1926–27, p. 6.

Investigation into Some Effects of Cold Drawing on the Strength and Endurance of Mild Steel, by R. M. Brown; 1927–28, p. 495.

Alloy Steel, by R. Hunter (Abridged); 1928–29, p. 696.

Flame Cutting of Steel for Welded Joints, by E. J. Clarke; 1933–34, p. 13.

Recent Developments in Steel Frame Construction, by C. J. Kavanagh; 1935–36, p. 64.

Some Factors Affecting the Yield Point in Mild Steel, by G. Cook; 1937–38, p. 371.

Use of Equal Strength Sections in Structural Design, by R. M. Kenadi and J. M. Harvey; 1950–51, p. 89.

SUGAR MACHINERY
Notes on Sugar Machinery, by A. B. Dennistoun (Abridged); 1913–14, p. 610.

SURFACE FINISH AND SURFACING
Some Aspects of Research on Friction and Wear, by F. T. Barwell; 1951–52, p. 64.
Modern Metal Cutting, by G. V. Stabler; 1955–56, p. 324.

SURVEYING AND LEVELLING
Application of Transversals to Engineering Field-work, by W. J. M. Rankine; 1899–91, p. 16.

TELEGRAPHY
See also Radio-Telegraphy and Telemopy
Signalling through Submarine Cables, by Sir Wm. Thomson; 1872–73, p. 119.
Wireless Communications over Sea, by J. Erskine-Murray; 1907–08, p. 162.
Radio in Relation to Shipping, by A. J. Gill; 1935–36, p. 11.

TELEVISION
Television, by G. W. O. Howe; 1936–37, p. 111.

TESTING AND TESTING MACHINES
See also Alloys, Iron, Metals, and Steel
Comparative Tensile Strength of Wrought Iron and Steel, by D. Kirkaldy; S.S.A., 1868–61, p. 132 and following p. 158.
Frictional Oil Test, by W. J. M. Rankine; 1861–62, p. 54.
Tenuity of Some Fibrous Substances, by W. J. M. Rankine; 1865–66, p. 29.
Strength of Cylindrical Boiler Shells, by H. MacColl; 1874–75, p. 111.
Strength and Fracture of Cast Iron, by W. J. Millar; 1875–76, p. 47.
Comparisons of Similar Structures as to Elasticity, Strength and Stability, by J. Thomson; 1875–76, p. 59.
Strain and Fracture of Bars of Various Materials, by W. J. Millar; 1877–78, p. 47.
Strengthening Malleable Iron by Breaking it, Straining it, and Compressing it, by T. Davison; 1880–81, p. 119.
Stresses in the Rim and Arms of a Fly-Wheel Rotating at Constant Speed, by J. G. Longbottom; 1918–19, p. 149.
Stress Lines in Steel after Permanent Deformation, by A. McCance; 1918–19, p. 252.
Engineering Research at the National Physical Laboratory, by H. J. Gough; 1932–33, p. 203.
Mechanical Methods of Solution of Stresses in Frames, by C. H. Lobban; 1933–34, p. 169.
Timber and Shipbuilding, by W. A. Robertson; 1936–37, p. 27.
Gamma Ray Examination of Materials, by C. Croxson; 1942–43, p. 165.
Experiments on the Effect of Residual Stress on the Strength of Welded Constructions, by J. Orr; 1944–45, p. 120.
Recent Research on Caustic Cracking in Boilers, by C. D. Weir; 1948–49, p. 165.

TEXTILE MACHINERY
TIMBER
Timber and Shipbuilding, by W. A. Robertson; 1936–37, p. 27.
Timber in Shipbuilding, by E. H. B. Boultin; 1944–45, p. 16.

TOOLS
See also Workshops and Works Management
Application of Hydraulic Pressure to Machine Tools, by R. H. Tweddell; 1880–81, p. 16.
Centrifugal Action in Practical Work, by J. Laidlaw; 1890–91, p. 149.
Percussive Tool for Caulking, Chipping, Mining, etc., by J. M. Ross; 1893–94, p. 25.
Application of Electricity to Engineering Tools, by F. J. Rowan; 1896–97, p. 159.
Experiments with Rapid Cutting Steel Tools, by C. Day; 1903–04, p. 170.
Centre and Chucking Lathes, by R. S. Anderson (Abridged); 1929–30, p. 614.
Flame Cutting of Steel for Welded Joints, by E. J. Clarke; 1933–34, p. 13.
Modern Metal Cutting, by G. V. Stabler; 1955–56, p. 324.

TRAMWAYS
Street Tramways, by J. Page; 1872–73, p. 57.
Cable Tramways, by R. Moore; 1883–84, p. 139.
Tramway and Railway Electric Traction, by G. G. Braid; 1906–07, p. 333.
City Local Passenger Transport, by W. C. Easton; 1927–28, p. 139.

TRANSPORT
See also Aeronautics and Aircraft, and Railway and Rolling Stock
Proper use of Animal Power as applied to Tram-cars, etc., by L. Hill; 1885–86, p. 111.
Economic Value of Ship Railways, by W. Smith; 1889-90, p. 87.
Presidential Address (Motor Vehicles), by T. B. Murray; 1919-20, p. 1.
City Local Passenger Transport, by W. C. Easton; 1927-28, p. 139.
Electrification of Glasgow District Subway, by W. R. Bruce; 1935-36, p. 131.

TUNNELLING
Some Causes of Failure in Tunnel Shafting, by W. C. Wallace; 1892-93, p. 197.
Cast Iron Segments for Railway and other Tunnels, by E. G. Casey; 1895-96, p. 111.
Tunnelling in Soft Material, with Special Reference to the Glasgow District Subway, by R. Simpson; 1897-98, p. 129.

VALVES AND VALVE GEARING
Pumping Engine Valve, by W. Neilson; 1857-58, p. 33.
Valves and Valve Gearing for Steam Engines, by W. Ingles; 1863-64, p. 115.
Theory and Practice of Metallic Surfaces Moving in Molecular Contact against a Heated Fluid under Pressure, as in the Slide Valve and Piston of the Steam Engine, by T. Adams; 1869-70, p. 151.
Cut-off Slide Valves, by A. Hadley; 1870-71, p. 97.
Cut-off Slide Valve wrought by Governor, by W. Clapperton; 1870-71, p. 193.
Rule for determining the Areas of Safety Valves of Steam Boilers, by J. Howden; 1871-72, p. 145.
New Form of Equilibrium Water Slide or Stop Valve, by F. G. M. Stoney; 1872-73, p. 25.
Advantages of Springs for Loading Safety Valves, by H. R. Robson; 1873-74, p. 49.
Construction of Safety Valves, by T. Adams; 1873-74, p. 121.
Report of Committee on Safety Valves; 1874-75, p. 13.
Spherical Seated Pendulous Safety Valve, by J. Nasmyth; 1876-77, p. 91.
Late Action of the Board of Trade with regard to Steam Valves, by W. Denny; 1877-78, p. 65.
Reversing Valve Gear, by A. Morton; 1882-83, p. 47.
Improvements in Valves for Steam Engines, by J. Spence; 1886-87, p. 73.
Slide Valve Gears, by A. MacLay; 1890-91, p. 31.
Thom's Slide Valve and Connections, by J. Thom; 1890-91, p. 69.
CENTENARY SUBJECT INDEX 67

Improvements in Valve Gears, by J. Ruskie; 1903–04, p. 84.

Jubilee of the Marine Spring-loaded Safety Valve, by D. MacNicoll; 1925–26, p. 113.

Cam-Driven Balanced Slide Valves, by J. Andrews; 1932–33, p. 259.

VENTILATION

See also Air Conditioning, Fans, and Mines

Cunningham's Positive Ventilating Apparatus, by W. Cunningham; 1877–78, p. 15.

VIBRATIONS

Vibration Problems in the Design of Marine Oil Engines, by E. H. Woodhead; 1944–45, p. 373.

Vibrations in Marine Engineering, by A. E. Fothergill; 1931–32, p. 246.

WATER SUPPLY

Glasgow Water Works, by J. M. Gale; 1863–84, p. 21.

Water Distribution and the Regulation of Supply; by T. Hoey; 1868–69, p. 25.

Recent Additions to Loch Katrine Water Works, by J. M. Gale; 1868–69, p. 123.

Action of Loch Katrine Water on Domestic Boilers, by J. Clinksill; 1869–76, p. 79.

St. Petersburg Water Works, by J. Thomson; 1879–80, p. 221.

CENTENARY SUBJECT INDEX

Delivery of Water through Copper Wire Cloth Strainers, by J. Barr; 1889–99, p. 181.

Water-Power Development in Canada, by J. C. McLennan; 1917–18, p. 264.

WELDING

Steamship Repairs by Electric and Autogenous Welding, by A. S. Younger; 1909–10, p. 203.

Fabrication by Electric Welding, by G. W. Coster (Abridged); 1931–32, p. 551.

Flame Cutting of Steel for Welded Joints, by E. J. Clarke; 1933–34, p. 13.

Electrically Welded Ships Bruce Hudson and Transfer, by E. R. Macmillan; 1936–37, p. 81.

Training and Control of Welders, by W. Heigh and J. Orr; 1936–37, p. 118.

Damage to H.M.S. Hunter, by H. Stanley; 1937–38, p. 85.

Welding as a Substitute for Casting, by S. F. Dorey; 1939–40, p. 168.

Chain Cables, by T. S. Glover; 1943–44, p. 11.

Higher Tensile Short-Link Steel Chain and Chain Slings, by W. Gibson Biggar; 1941–52, p. 140.

WINDING ENGINES

Winding Apparatus including Mining Hoists, by J. Robertson; 1857–58, p. 82.

WOOD-WORKING MACHINERY

Veneer Cutting Machinery, by J. Whitesmith; 1861–62, p. 84.

WORKSHOPS AND WORKS MANAGEMENT

See also Management, Standardization, and Surface Finish and Surfacing

Workshop Administration, by D. Cowan; 1899–1900, p. 227.

Administration of Workshops, by D. Cowan; 1900–01, p. 265.

Question of Scientific Management, by J. Richardson; 1917–18, p. 154.

Payment by Results and Rate-Fixing, by S. Mavor; 1930–31, p. 10.

Workshop Practice in Automobile Engineering, by Sir Herbert Austin; 1931–32, p. 308.

Mechanical Ability, by C. A. Oakley; 1932–33, p. 561.

Flame Cutting of Steel for Welded Joints, by E. J. Clarke; 1933–34, p. 13.

Influence of Film and Time on Force and Shrink Fits, by R. Russell; 1936–37, p. 356.

Accidents in Factories and Workshops, by H. H. C. Thomas; 1937–38, p. 149.

Accidents in Factories and Workshops, by E. Royal; 1937–38, p. 151.

President Address (Engineer and Society), by F. C. Stewart; 1942–43, p. 1.

President Address (Full Employment in British Shipyards), by A. M. Stephen; 1944–45, p. I.

Modernization on the Reconversion of Engineering and Shipbuilding Workshops, by H. Orenstein; 1945–46, p. 381.

Economy by Efficient Calculation, by W. Heigh; 1948–49, p. 31.

Modern Metal Cutting, by G. V. Stabler; 1955–56, p. 324.

YACHTS
