Presidential Address

Innovating Icons – Eye-catching Structures

Karen Dinardo

Synopsis

From an interest in notable building structures and their design and aesthetics around the World, Karen has made a selection that stand out amongst those she has visited and those known of, and even the lesser known. The engineering design and innovations behind their conception and construction is featured in this colourful presentation, which leads to describe personal involvement with 2 public buildings of note which fulfil the successful linkage of the historic to the modern at two iconic locations in Scotland, both of which involved their own major design and construction challenges. A conclusion on her "Tour overview", also looking to the future, will be presented.

Karen Dinardo commenced her career with Sir Murdoch MacDonald & Partners, Cambridge. Vacation work experience was with manufacturing and design offices in Germany and USA. She joined her father at Dinardo Partnership in 1988. Projects include a wide variety of civil/structural works from 1993 being based in Aberdeen, Highlands and Islands, and Moray. Karen achieved Chartered status in 1992 and 1999 with IStructE and ICE, and CIHT in 1993. Her current role is as Director of Dinardo Partnership, Consulting Engineers, based in Paisley.
